MECHANIX PRO

BUSINESS REQUIREMENTS DOCUMENT

Billing, payments, pricing and website experience

What we heard from you, what each change will look like before we build it, and the order we will deliver it in.

Prepared for: Mechanix Pro (NOVA VENTURES)

Version 1.0 for approval · 27 October 2026

Status: awaiting your review and sign-off

1. Summary

This document turns your handwritten notes and later messages into a list of changes, shows a picture of each change **before we edit anything**, and sets the delivery order. Pictures marked Live preview are real screenshots of the working site. Pictures marked Mock-up show the proposed screen; they will be built to match once you approve.

Decisions you have already given us

Topic	Your decision
Invoice must-haves	Customer name, mobile number and vehicle number are required to save, print or email an invoice. Email is optional. "Serial number" is the invoice number, which stays automatic.
GST on prices	All prices stay exactly as they are and are **excluding GST and taxes**. GST at 18% is added on top and shown separately on the quote, payment and invoice.
New service	"Puncture sorted at your doorstep or anywhere": **₹599 excluding GST**.
Prices screen	The admin can edit packages and add-ons, and add new package types.
Payment link	A link shared on WhatsApp with the mechanic to pay the company its share of what the mechanic collected from the customer. Every payment is recorded automatically when the payment provider confirms it.

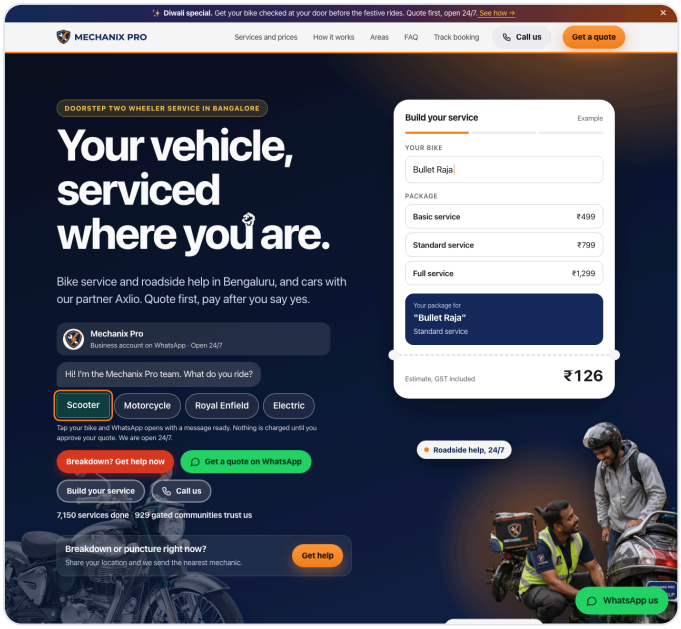

Everything in this document at a glance

#	Change	Where	Status
1	Moving bike in the website background	Website home	Built, preview below
2	"Watch the work": your two job videos on the home page	Website home	Built, preview below
3	Invoice details required before save, print or email; vehicle number on the invoice	Admin, invoices	Built, awaiting release
4	Booking shows what the customer has paid, the balance and the vehicle number	Admin, bookings and customers	Proposed
5	Change an invoice: update the same one, or issue a separate one	Admin, invoices	Proposed
6	Payment link on WhatsApp for the mechanic to pay the company share	Admin, payments	Proposed
7	Warranty card with QR, validity and terms on WhatsApp once a booking is fully paid	Admin and customer WhatsApp	Proposed
8	Prices excluding GST everywhere; new Puncture service; add options; website rate card	Admin prices, website, quotes	Proposed
9	Refreshed admin theme and easier screens	Admin	Proposed

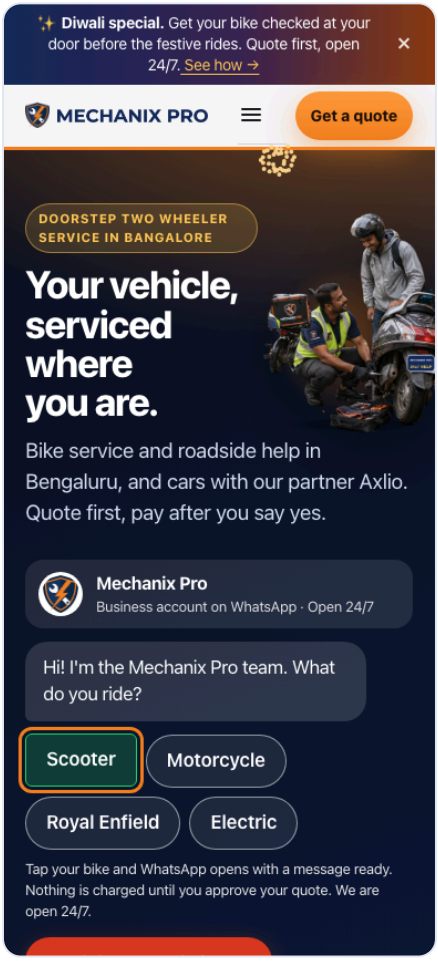

2. Website: moving bike and job videos

2.1 Moving bike in the background Live preview

The Royal Enfield picture you sent now sits behind the home page headline and rides slowly across the screen, with a glowing road line under it. It is kept faint so the headline and buttons stay easy to read. It stops moving for visitors who have turned off animation on their phone, and it is smaller on phones.

Desktop: the bike is visible at the bottom-left, behind the text.

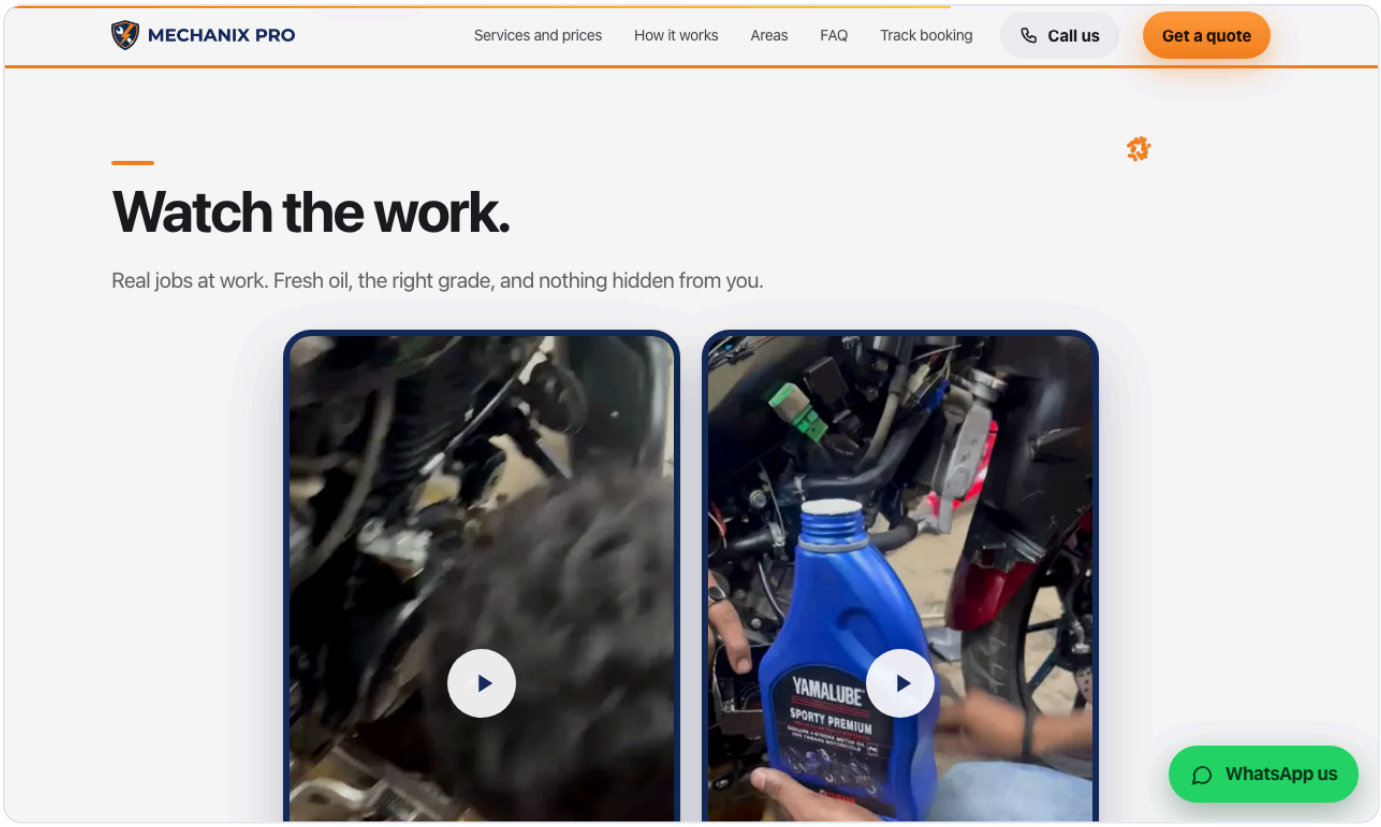

Phone: smaller, same ride.

> The bike picture shows Royal Enfield branding. It is used as a decorative background only. If you prefer a picture of your own bikes later, we can swap it.

2.2 "Watch the work": your two videos Live preview

Your two oil-change clips appear as a new section below "See how it feels". Each plays silently on a loop while it is on screen, pauses when the visitor scrolls away, and has a tap-to-play button. The clips are compressed (about 0.9 MB each) so the page stays fast.

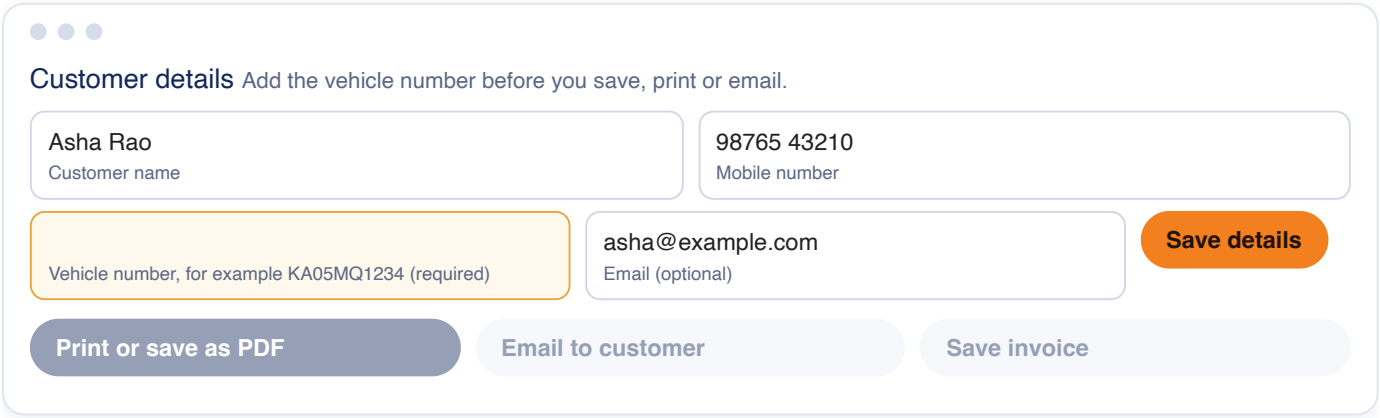

Two phone-style video cards with a short caption each.

The oil bottles in the clips show other companies' brand names. The section carries a small line saying those names belong to their makers. If you would rather hide them, we can blur the labels.

3. Invoices

3.1 Required details, shown at the top of every invoice Mock-up

An invoice cannot be saved, printed or emailed until the customer name, mobile number and vehicle number are filled. The screen tells you exactly which one is missing. Email is optional. These details also print on the PDF and appear in the emailed invoice.

3.2 Changing an invoice: same invoice or a new one Mock-up

When something changes after an invoice is issued, you choose one of two clear paths:

Update this invoice

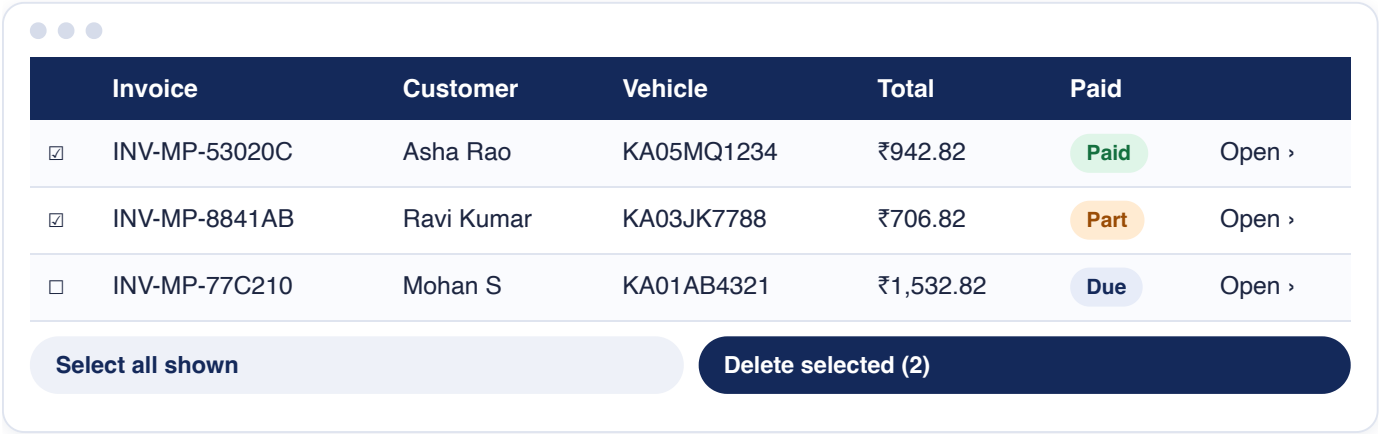

Use for a correction (wrong amount, missing item, wrong vehicle number). The invoice keeps its number and gets a revision mark, for example **INV-MP-53020C-R2**. The old version stays in the register but is marked "replaced".

Create a separate invoice

Use for extra work done later, or when part of the bill is for a different customer or company. It gets its own number, for example **INV-MP-53020C-B**, and its own total. The booking shows all of its invoices together with one overall paid and balance figure.

Every change asks for a short reason and is recorded, so nothing is ever lost. Deleted invoices are hidden, not erased, and can be restored.

3.3 Open invoices to edit; select and delete several Mock-up

Clicking a row opens that invoice ready to edit. Select mode lets you tick several and delete them with one confirmation and a reason.

4. Payments, bookings and customers

4.1 Booking shows what the customer paid Mock-up

Booking MP-53020C · Asha Rao · KA05MQ1234 (Honda Activa)

₹942.82	₹500.00	₹442.82	12 Oct
Total incl. GST	Paid by customer	Balance	Last payment

Payments list: ₹500 UPI on 12 Oct 2026. The customer's page shows each vehicle with its number and the customer's total spend across all bookings.

4.2 Payment link on WhatsApp for the mechanic Mock-up

When a mechanic collects money from the customer, the company's share comes back through a payment link sent on WhatsApp. The mechanic pays only the company's share, never the full amount. Each payment is recorded the moment the payment provider confirms it.

1. Mechanic collects
Customer pays the mechanic at the doorstep.

›

2. Admin sends link
One tap sends a WhatsApp message with the amount due to the company.

›

3. Mechanic pays
Pays the company's share by UPI or card.

›

4. Recorded
Matched to the booking automatically. Unmatched payments wait in a list.

Hi Suresh, booking **MP-53020C** (KA05MQ1234) is complete.
Customer paid you **₹942.82**. Your share **₹282.85**.
Please pay the company share **₹659.97** here:
https://rzp.io/l/mxp-xxxxxx

4:12 PM ✓✓

Example figures. Real amounts follow the mechanic's agreed percentage and the company's chosen basis.

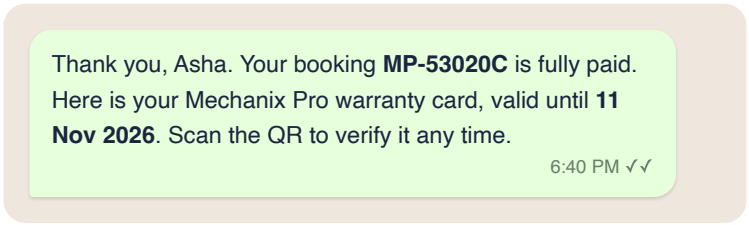

To confirm before build: one link per booking (shown above), or one fixed link the mechanic uses for any amount. We recommend one link per booking because the amount and the booking are filled in for them.

5. Warranty card on WhatsApp

As soon as a booking is fully paid, the customer receives a warranty card on WhatsApp. It carries the booking details, the validity dates, a short summary of the terms and a QR code. Scanning the QR opens a page on mechanixpro.in that confirms the warranty is genuine and shows the same details.

5.1 The card Mock-up

5.2 Draft terms printed on the card and the verify page

- **Validity:** 30 days from the date the service was done (matches the current "30-day service warranty" on the site).
- **Covers:** workmanship on the service performed. Parts carry the part maker's limited warranty, as labelled on the invoice.
- **Does not cover:** accidents, misuse, water damage, wear parts used up in normal riding, or work done by anyone else after our service.
- **To claim:** message the number on the card with the booking number and a photo of the issue.

These terms are draft wording. Please confirm or edit them before they go on a customer-facing card; the final wording should be reviewed against your invoice terms.

When it is sent: once, automatically, when the booking's paid amount equals its total. If the amount changes later (for example extra work), the card is not re-sent unless you choose to resend it.

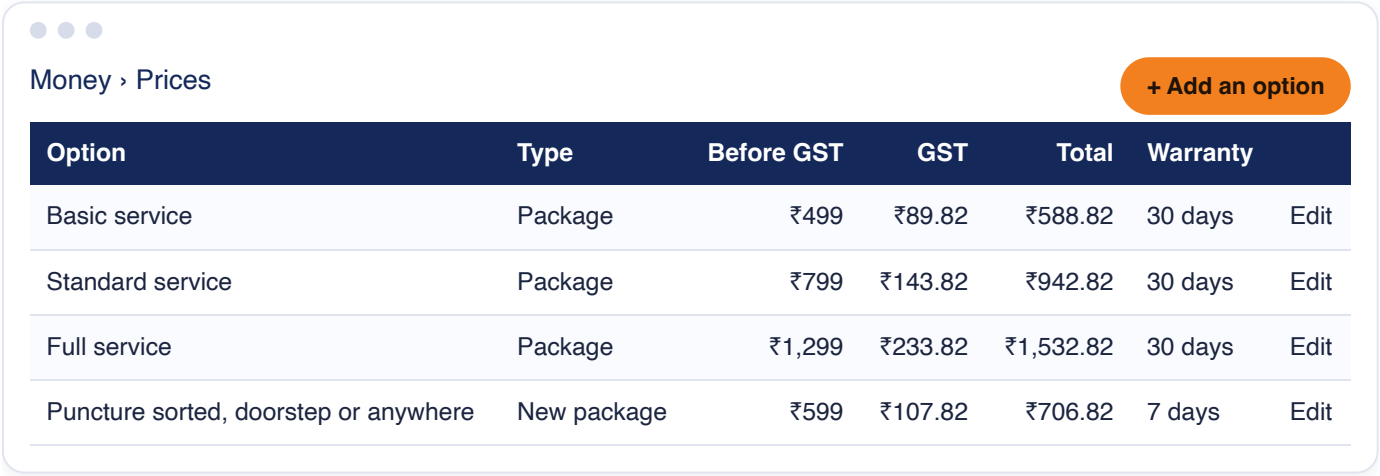

6. Prices excluding GST, Puncture service and rate card

Your price numbers do not change. They are before GST and taxes, and 18% GST is added on top. Customers see both parts clearly before they pay.

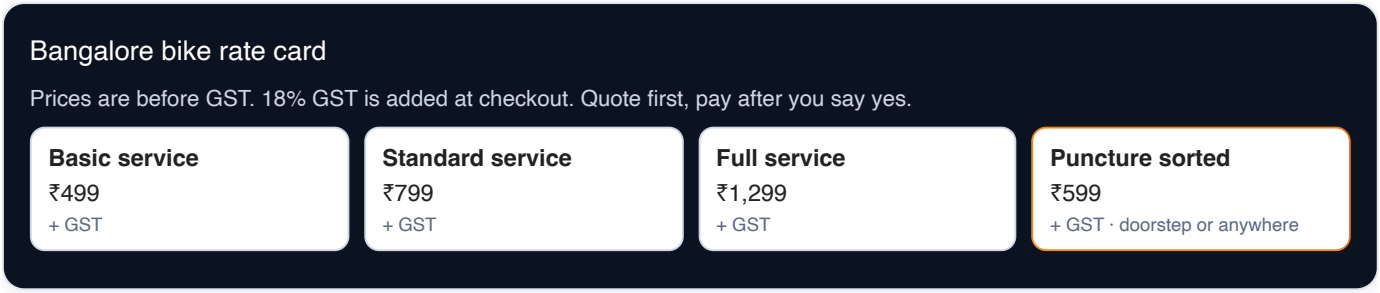

Service	Price (excl. GST)	GST 18%	Customer pays
Basic service	₹499.00	₹89.82	**₹588.82**
Standard service	₹799.00	₹143.82	**₹942.82**
Full service	₹1,299.00	₹233.82	**₹1,532.82**
Puncture sorted at your doorstep or anywhere (new)	**₹599.00**	₹107.82	**₹706.82**

Please note: today the site and the payment amounts treat these numbers as already including GST. Moving to "excluding GST" means customers will pay about 18% more than they do now for the same service, unless you choose to lower the numbers. We have followed your instruction (numbers stay, GST added on top). Tell us if you want any price adjusted before release.

6.1 Prices screen in the admin Mock-up

6.2 Website rate card Mock-up

7. Refreshed theme and easier screens (admin)

We will bring the admin panel in line with the website: the same navy and orange, larger type, roomier spacing, clear status colours and bigger tap targets so it works well on a phone. The structure you already know stays the same.

Proposed look Mock-up

Today

27 Oct 2026

12	₹9,420	₹2,160	3
Bookings today	Collected	Balance due	Mechanic payments due

Booking	Customer	Vehicle	Status	
MP-53020C	Asha Rao	KA05MQ1234	Paid	Open
MP-8841AB	Ravi Kumar	KA03JK7788	Part paid	Send payment link

What changes

- One clear page title and one main action per screen.
- Paid, part paid and due shown with the same colours everywhere.
- Vehicle number and paid amount visible wherever a booking or customer is listed.
- Large buttons and fields on phones; keyboard focus visible; text that meets accessibility contrast.

8. Delivery order

Phase	What you will see	Depends on
1 (done, awaiting release)	Invoice details required; vehicle number and email on invoice and email; moving bike; job videos	Your release approval
2	Edit from the invoice list; same-or-new invoice choice; select and delete; booking paid and balance; customer vehicle number and total spend	Phase 1
3	Prices excluding GST everywhere; Puncture ₹599; add options; website rate card; charge amounts with GST added	Your confirmation of the price table in section 6
4	Mechanic payment link on WhatsApp with automatic recording and an unmatched-payments list	Payment provider links; phase 3 amounts
5	Warranty card with QR on WhatsApp, verify page	WhatsApp message template approval by Meta; your approval of the terms
6	Admin theme refresh	Can run alongside the others

9. Assumptions, risks and open points

- **Handwriting:** a few lines in the notes were hard to read. We read them as set out above. Please correct anything we got wrong.
- **WhatsApp approvals:** the warranty card and the mechanic payment message are sent as WhatsApp template messages. Meta must approve each template first, which can take a day or more and is outside our control. Meta business verification also helps.
- **Price change:** moving to prices excluding GST changes what customers are charged. We will not release phase 3 until you approve the price table.
- **Accounting records:** invoices are never erased. Edits create revisions; deletes hide and can be restored.
- **Brand names in media:** the background bike and the oil bottles show other companies' brands; used as decoration and job footage only.
- **Out of scope now:** the dashboard and bookings screens (you marked them "all good"), AiSensy and ads.

Questions for you

1. Payment link: one link per booking (recommended) or one fixed link for any amount?
2. Warranty: is 30 days right for every service, and what should the Puncture service carry (we assumed 7 days)? Please approve or edit the terms in section 5.2.
3. Price table in section 6: approve, or tell us which numbers to change.
4. Admin refresh: any colours or screens you especially want changed?
